# SWOT ANALYSIS OF A CYBER SECURITY ENGINEER

A cyber security engineer is the one who involves creating and managing hardware ,software and security policies for the protection of systems , networks and data.

# STRENGTHS -

- 1- The very first strength is my time management . I manage my time in such a manner so that I can complete my each task in a given stipulated time period . For it, I prepare my time table for each day beforehand .
- 2- My determination towards my work plays a vital role in achieving my goals efficiently and effectively.
- 3- I don't have any anger issues . I keep my mind calm in each situation even when everything happens against my wish and will.
- 4- My learning power is quite good. I mug up things little bit quickly and frequently . As a result of which I got a very decent marks in my social science subject and I don't need any fillers .

# WEAKNESSES AND MY ACTION

## PLAN-

1- My English speaking is quite good but sometimes , I loose my self- confidence and get nervous when I am asked to perform in front of audience .

ACTION PLAN - I have decided to various self confidence boost up sessions . As well as, I shall practice in front of mirror everyday to overcome my stage fear.

I shall participate in various stage performances .

# OPPORTUNITIES -

- ▶ 1- I want to complete various online certification courses and internships to boost up my coding skills and the best part of all is that my university is providing us with all facilities.
- ▶ 2- I love to write poetries in my free time . So , to enhance my poetic skills I shall grab an opportunity to join the literature club .

# THREATS -

- ▶ 1- Immense growth of competition in our field is one of threat that each one of us are facing .
- ▶ 2- Difference in the number of job opportunities and job seekers is the second threat .
